WORK EXPERIENCE

P&F Solutions

Online, NJ

Cloud Engineering Intern

August 2024 – Present

- Applied knowledge of cloud computing, Terraform, and Ansible to design and implement scalable cloud architecture, utilizing best practices and automation to improve deployment efficiency by 25%.
- Configured virtual machines, software-defined networks, and storage with a focus on security and governance.
- Developed comprehensive network diagrams, backup/recovery plans, and disaster recovery designs, reducing potential downtime by 20% through meticulous planning and execution.

New Jersey Courts

Bridgeton, NJ

Software Developer - IT Analyst 1 Intern

June 2024 – Present

- Lead the planning and development of an inventory management system using Microsoft Power Apps and Power Automate (Flows). Effectively integrated Azure Active Directory and databases, enhancing inventory tracking accuracy by 20%.
- Managed IT tickets and Azure cloud configurations for 500 court employees, enhancing system stability, security, and uptime.
- Configured and deployed workstations with custom operating systems and applications. Assisted in re-engineering efforts to migrate from legacy technology to new technology.

New Jersey Institute of Technology

Newark, NJ

Teaching Assistant - Data & Computer Science

January 2023 – Present

- Facilitated learning by teaching fundamentals of Java and Python, along with core software development concepts of Object-Oriented Programming (OOP) and Data Structures and Algorithms (DSA), contributing to a 90% student pass rate.
- Provided expert guidance in debugging and software troubleshooting, resolving 95% of technical issues within 24 hours, ensuring smooth lab operations and student progress.

PROJECTS

Financial Assets Analysis Software - Flutter Multiplatform

- Technologies Used: **Flutter, Dart, Firebase, TensorFlow, Machine Learning, Python, Pandas, NumPy, REST API, JSON.**
- Engineered a full stack Flutter application to fetch, analyze, and display market data for stocks and cryptocurrencies. Deployed python as backend using REST APIs for real-time market data integration and Firebase for database and secure authentication.
- Developed and implemented a stock price prediction model using Python's machine learning libraries, TensorFlow and Keras, leveraging LSTM neural networks for time series forecasting.

Chess Application - Java, JavaFX.

- Engineered a sophisticated Chess application with a responsive graphical user interface, intuitive drag-and-drop mechanism, precise event handling, and a robust move validation system to ensure strict adherence to chess rules and achieving 100% accuracy.

Marine Navigation & Mapping Software

- Technologies Used: **Microsoft Maps API, Marine Traffic API, PHP, MySQL, JavaScript, Bootstrap, HTML.**
- Led the development of a marine mapping software, a dynamic web application offering real-time global ship tracking, shortest route calculations, and detailed port information for efficient navigation.

CERTIFICATIONS

- Microsoft Azure (AZ 900)
- Google Data Analytics
